Summary

Motivated Computer Science Engineering graduate with professional experience in full-stack web development and backend engineering. Proficient in Java, Spring Boot, NestJS, React, TypeScript, and database technologies including MySQL and PostgreSQL. Experienced in developing RESTful APIs, integrating third-party services, and building efficient web applications. Eager to leverage technical expertise and problem-solving skills to contribute to innovative software development projects.

Education

BE in Computer Science (2022-2026)
Ponjesly College Of Engineering, Nagercoil.
"Affiliated to Anna University".
CGPA: 8.0

Christuraja Matriculation Higher Secondary School, Marthandam

HSC: 75% **SSLC:** 71.8%

Skills

Programming Languages	Web Technologies	Database
Java, JavaScript	HTML, CSS, Bootstrap, Spring Boot, React, NestJS, Node.js	MySQL, PostgreSQL
Soft Skills	**Agile and scrum methodologies**	**Languages Known**
Problem Solving, Teamwork, Communication, Adaptability	Sprint planning, daily stand up, user stories, task tracking	Tamil, English

Work Experience

Imperial Info System Pvt. Ltd. | August 2026 – Present

- Working as a Full Stack Developer on live, real-world projects.
- Developing and maintaining web applications using frontend and backend technologies.
- Working with databases to manage, retrieve, and maintain application data.
- Identifying and fixing bugs, improving application functionality and performance.
- Collaborating with team members to develop and deliver project requirements

Internships

YOSAM ERP Developer - PHP, HTML, CSS, JavaScript (1st July to 1st Aug 2026)

- Worked on a Conference Management System using PHP, HTML, CSS, and JavaScript.
- Developed web pages and contributed to application functionality.
- Gained practical experience in front-end and back-end web development.

Agile Info Tech - Python Full Stack Development (23rd June 2025 to 23rd July 2025)

- Gained hands-on experience in basic web development using Python, HTML, and CSS.
- Used GitHub for project management and version control.

Srishti Campus - Python & Data Science (14th Feb 2024 to 5th March 2024)

- Learned Python programming fundamentals and data handling techniques.
- Explored basic data science concepts and practical applications.

Projects

Mydoo – School Management Platform | React, TypeScript, NestJS, PostgreSQL, TypeORM, REST APIs

- Developed and maintained the Admin Panel using React and TypeScript for managing school information and platform operations.
- Developed backend services using NestJS and TypeScript.
- Designed and implemented RESTful APIs for school profile management, admission details, and location-based search.
- Integrated PostgreSQL using TypeORM for database operations and entity relationships.
- Implemented authentication, authorization, and role-based access control.
- Integrated map services for location-based search and geolocation functionality.
- Implemented email integration for automated notifications and communication.
- Connected the React Admin Panel with backend APIs for seamless data management.

Bougainville Resort – Luxury Resort Website | HTML, CSS, Javascript, Bootstrap

- Developed a responsive website for a luxury beach resort.
- Designed user-friendly interfaces to showcase resort accommodations, facilities and services.
- Implemented sections for room details, pricing, guest reviews and contact information.
- Integrated reservation and booking links for customer convenience.
- Created an attractive layout with interactive navigation and visual elements.

London Star Education – Online Tuition Platform | HTML, CSS, JavaScript, Bootstrap

- Developed a responsive educational website to showcase online tuition services and academic programs.
- Designed interactive sections for course listings, tuition categories, tutor profiles, pricing plans, and holiday camps.
- Implemented student and tutor login interfaces, online booking options, and enquiry forms.
- Created user-friendly navigation and responsive layouts to enhance the browsing experience across devices.

Real-Time Traffic Prediction & Congestion Control | Python, XGBoost, OpenCV, Flask

- Developed a machine learning system for real-time traffic prediction using vehicle detection.
- Built a Flask web application with OpenCV and XGBoost for congestion analysis.
- Improved traffic monitoring accuracy through data-driven congestion prediction.

ConferHub – Conference Management System | PHP, MySQL, HTML, CSS, JavaScript

- Developed a conference management platform with registration and user authentication.
- Built an admin dashboard for managing conferences and participant details.
- Enhanced user experience with responsive design and secure database integration.
